

Accelerated Reader

Students are encouraged to read, read, read and understand what they have read. Accelerated Reader is used by most teachers as a means to encourage reading.

Any book, fiction or non-fiction, can be looked up at the website www.arbookfind.com. Information about reading level, quiz type, and number of points is shown for most books.

The Accelerated Reader program at St. Barnabas is web-based and therefore students can access all books and quizzes from any computer using their log-in information. There is no longer a specific list of books that students must use. Teachers may require a specific book genre from time to time to encourage students to read all types of writing and to integrate with the rest of the curriculum.
